

## ALEASOFT WILL BE PRESENT IN THREE IMPORTANT EVENTS OF THE SECTOR IN THE NEXT DAYS

**AleaSoft, May 9, 2019.** During the next days, from May 14 to 21, AleaSoft will participate in three important events in the energy and renewable energy sector: the Intersolar fair in Munich, the E-Network meeting organized by Ateneo de Energía, and the APPA conference on renewable financing.

On Tuesday, May 14, **AleaSoft** sponsors a conference on renewable financing organized by the Association of Renewable Energy Companies (**APPA**, for its acronym in Spanish) in Madrid. The conference, entitled "PPAs vs. Merchant", will analyze the different options to finance renewable projects, being the options of PPA contracts and directly to market which will focus the most attention. The ambitious renewable targets for 2030 make this conference an essential meeting to discuss a key and necessary aspect for any project to be carried out, such as its financing. The conference will feature experts from the energy sector, banks and lawyers. **AleaSoft** will participate with a presentation on the perspectives of long-term market prices, one of the fields in which the consultancy is specialized.

The **Intersolar Europe** fair, held annually in Munich, is the world's largest meeting of the solar industry. This year it will be held from May 15 to 17 and it will count with **AleaSoft** presence, which will show its forecasting services for the energy sector. The spectacular growth of solar power in Europe that is expected for the next decade makes **AleaSoft** forecasts very interesting and essential. The consultancy will be present during the three days of the fair in hall C4, stand 617.

And finally, on May 20 and 21, **AleaSoft** will participate in the E-Network meeting organized by the **Ateneo de Energía** in Madrid. The event was conceived as a meeting place for professionals in the energy sector to create and strengthen links, and learn more about the operation, peculiarities and opportunities of five European electricity markets. **AleaSoft**, besides being present at the meeting, will participate in the session on the Italian electricity market, describing the formation and characteristics of the price in that market.
